RI TRANSPARENCY REPORT

2020

Votorantim Asset Management DTVM Ltda.

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.4 Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

The Superintendency of Strategy and Fund Management incorporates ESG criteria in the process of selecting and maintaining external managers and selecting specific investment funds. BV Asset believes that the application of ESG criteria in the process of selecting external managers is an important tool for the engagement of the evaluated managers, as those responsible for the management are questioned in social and environmental matters relevant to the sustainable growth of the business and with strong weight in the investment decision of analysts and managers.

The Due-Diligence process is indispensable for the selection of external managers. Through ESG questions with qualitative and quantitative criteria, which represent 10% of the total weight of the questionnaire, a grade is awarded to the manager who, on a scale of one to five, must be greater than or equal to three for their approval. This grade must be reviewed every two years. The environmental, social and governance criteria are dealt with in this procedure by four main categories: Soundness, Transparency, Credibility and Management.

In the Solidity category, the managers' long-term strategy is evaluated, as well as the incorporation of socio-environmental and governance aspects into their strategy. In Transparency, the manager is evaluated regarding the disclosure of policies and documents related to investments and the positioning in participation in Meetings. Regarding the Credibility criterion, the manager receives scores according to the degree of commitment to the Responsible Investment theme. The Management session focuses on the largest number of questions with ESG

attributes, assessing the level of implementation of the theme in the manager. The issues evaluated in this session consist of: dissemination of these good practices in all areas, training, offering products with ESG attributes and the application of these criteria in decision making and compensation definition.

Asset Class	Describe what processes are in place and the outputs or outcomes achieved
Listed equities - ESG incorporation	The Superintendency of Strategy and Fund Management incorporates ASG criteria in the process of selecting and maintaining external managers and selecting specific investment funds. BV Asset believes that the application of ASG criteria in the process of selecting external managers is an important tool for the engagement of the evaluated managers, as those responsible for the management are questioned in social and environmental matters relevant to the sustainable growth of the business and with strong weight in the investment decision of analysts and managers.
Listed equities - engagement	BV Asset adopts in its policy of selection and maintenance of external Managers, demanding rules of evaluation of ASG aspects, which are observed in the Due Diligence and monitoring questionnaires, engaging and prioritizing managers with sustainable practices in their investment decisions. During this evaluation process, external Managers are asked to provide documents that mainly prove: their ASG Policies; the incentive for invested companies to provide sustainable practices; the integration of ASG aspects in their investment decisions; Governance, compliance and management strategies of the investment process; and Voting Policies in company meetings.
Listed equities - (proxy) voting	BV Asset will act in the best interest of the shareholders of the investment funds we manage, in order to respect their fiduciary duty and ensure equal treatment for all investors of such funds. Voting may take place by one of our management team representatives, either remotely or through dedicated voting service providers. Voting decisions are discussed and approved in a specially formed committee ("Voting Proxy Committee"), are recorded and formalized in minutes and published on the BV Asset website on the World Wide Web (https://www.bancobv.com.br/web/site/pt/vam).
